- Hydronic heating doesn't dry out the inside air like forced air systems.
- Gentle convection warms the full length of cold walls and windows.
- Rooms are easily zoned for individual control, resulting in lower fuel bills.
- A dedicated heating system has none of the compromises of a combined heating/ cooling system.

Remembering Malcolm Brodie

On September 10th our longtime colleague and friend Malcolm Brodie passed away. Malcolm had been ill for a few weeks and was hospitalized recently with heart failure. Malcolm worked for Commercial Heating Supply and more recently CHS, a division of Torrco for 32 years. He was hired by CHS in June of 1986 as a sales rep to sell commercial heating equipment. He soon became an industry icon and resource for commercial heating equipment in Connecticut, Western MA, and RI. If it was in the commercial boiler-room, Malcolm was the expert. All of us at Torrco recognize the loss to his family, friends, and our company.
