

LG TRAINING SESSIONS

Torrco Waterbury, 100 North Elm Street
2nd floor Training Center
8:30 AM - 3:30 PM

Enter through the blue TRAINING door and go upstairs.
Our training center is the 2nd door on the right.

Our HVAC training center is packed with technology and the latest ground-breaking LG inverter equipment.
We are ready to train you on residential and commercial VRF equipment and controls, including AirZone, the only true inverter zoning product.

Check out our latest calendar below for upcoming LG training sessions and register at www.TorrcoPro.com.

Once you register on www.TorrcoPro.com, you must register on the LG portal, Schoox, to receive credit for the course.

LG Course Overview:

DFS-01

This course will give a salesperson/contractor an overview of the steps that are necessary for applying and designing an RLC system.

We will discuss the steps needed to properly select the correct equipment for the application and to properly layout a well performing system.

This course should give the salesperson/contractor the knowledge and confidence to professionally handle any RLC application.

DFS-04

The manufacturer's guidelines for installing the piping and wiring systems connected to the indoor and outdoor LG DFS air conditioning equipment. Presentation and discussions will also cover charging and pre-commissioning tasks that must be completed before startup. During lab activities students will be introduced to LG SIM 2.0 (LG Monitoring View Software) which is the tool that must be used to evaluate equipment performance.

DFS-10

LG DFS system electrical connections and interrelationships will be discussed. Physical access to all major functional components will be covered along with practical guidance concerning the service and maintenance of LG DFS equipment.

MVS-98/99

LG's guidelines for installing the piping and wiring systems connected to the indoor and outdoor LG Multi V S air conditioning equipment and the practical skills necessary to perform an external authorized commissioning of LG Multi V S systems. You will become familiar the steps of the troubleshooting process by means classroom lecture and reinforcement of lessons by practical hands on exercises on live equipment in the lab.

DFS-01 & 04 - Includes lunch & reference material - Cost \$125

DFS-10 - Includes lunch, reference material & LGMV tool - Cost \$125

MVS 98/99 - Includes lunch, reference material & LGMV tool - Cost \$250
