Beckett®

GeniSys® 7565 120V Advanced Oil Burner Control

The Beckett GeniSys 7565 Advanced Burner Control is a 120VAC primary safety control for residential and light commercial oil burners used in boiler, furnace, and water heater applications having firing rates less than 20 gph.

Features & Benefits

- Last 50 cycles and last 15 faults history
- Compatible with burners running #2 fuel oil, up to 100% biodiesel, and up to 100% renewable diesel
- Separate inputs for combustion air and blocked vent
- Enhanced diagnostics and programming through the myTechnician™ app
- Configurable for interrupted or intermittent ignition operation
- Configurable timings for valve-on delay (or “pre-purge”) and motor-off delay (or “post-purge”)
- 8 status lights provide hands-free understanding of burner operation
- Pump prime mode for technicians
- Extra terminal for compatibility with smart thermostats
- Upon request, sends live control data and history to R.W. Beckett Technical Support when troubleshooting
- Auto-configures valve-on delay timing for a solenoid valve upon detection

Beckett myTechnician Mobile App

The GeniSys 7565 is compatible with the my Technician Ecosystem and works with the myTechnician app. The myTechnician™ Mobile Application is one of the best tools that a professional oil heat technician can have at a customer job site by identifying problems, reducing job time, and eliminating call backs. The myTechnician™ app is available for both iOS and Android operating systems.

U.S. Boiler Company

USB Connect

Connect & Collect Promotion

Are you ready to skip setting combustion, outdoor reset sensor installation, and LP conversion kit installation on your next boiler install? Experience how easy it is to install an Alta boiler and earn a free service kit and \$100 in swag.

INSTALL

Install an Alta boiler using the USB-Connect app and hardware (sold separately, p/n 111667-01)

CONNECT

Register the boiler via the USB-Connect app

COLLECT

Receive an email to order your free boiler service kit and a \$100 voucher for U.S. Boiler gear

Terms: Limit one per contractor company. Boiler must be registered between 9/1/2023 and 12/31/2023. Valid only in the United States. Limited quantities available. Email to order your items will be sent within two weeks of boiler registration.

WATTS®

1/2 inch B911-PRxT PRESS X THREAD WATTS COMBINATION WATER FEEDER AND BACKFLOW PREVENTER 88005793

Bronze Combination Fill Valve and Backflow Preventers is designed for use on the boiler feed lines of commercial and residential hydronic heating systems to provide make-up water to the boiler and prevent backflow when supply pressure falls below system pressure.

FEATURES

- Bronze body for durability
- Viega ProPress (R) connection adapters
- Strainer screen
- Horizontal or vertical installation

AOSmith®

PROLINE® XE VOLTEX® HYBRID ELECTRIC HEAT PUMP WATER HEATERS

Offers an integrated system that utilizes heat pump technology to provide a more efficient way to heat water with electricity.

The Voltex pulls heat from the surrounding air and deposits the heat into the tank. The end result is very efficient production of hot water, with cooler and dehumidified air as a welcome by-product.
