SUPERSTOR ULTRA MAX MSSU Series Indirect Water Heaters

The SuperStor® Ultra Max is the Indirect water heater you know and love, with upgraded features and benefits that have been taken to the MAX!

FEATURES:

- **STAINLESS STEEL** tank constructed of high-quality, lightweight stainless steel making it easier to handle than glass-lined water heaters.
- **SUPERFLEX HEAT EXCHANGER** Lightweight, corrugated stainless steel heat exchanger allows the coil to flex, minimizing scale buildup and prolonging tank life.
- **TOP CONNECTIONS** for cold inlet, hot outlet, and relief valve make installation easy.
- **DAILY SCHEDULING** set up daily scheduling to ensure hot water is available when needed most.
- **FULLY AUTOMATIC SURFACE MOUNTED THERMOSTAT** for controlling the temperature, combined with a manual energy cut-off to prevent overheating.
- **INLET DIPTUBE** injects cold water into the bottom of the tank to ensure only the hottest water is drawn from the top of the tank.
- **TEMPERATURE AND PRESSURE RELIEF VALVE** – Included for ease of installation.
- **DURABLE BRASS DRAIN VALVE** – Included for ease of installation.

Warranties:

- Limited lifetime tank warranty* for residential use/1 year components
- 5 year tank warranty for commercial use/1 year components

*With online registration. See product warranty for details.
