NEW! Navien NPF Series

Upflow & horizontal high-efficiency hydro-furnaces heat water by burning the gas in a sealed combustion heat exchanger, completely isolated from the airstream. The heated water is then pumped through a hydronic heat exchanger that gently transfers the heat into the air. This unique method improves operational control, provides safe and even heating, and keeps operating sounds to a minimum.

MEGAPRESS® G

GAS FITTINGS

MEGAPRESS® G is now approved for fuel oil fill & vent piping.

(NFPA 31/UL 180)

Viega MegaPressG fittings are:

- A safe and fast way to connect steel pipe using state of the art press technology.
- Now approved for fill & vent piping on oil tanks.
- Easy to install, saving time and labor.
- Compatible with a wide range of approved applications including natural gas, propane, and now oil tanks.
- Fittings have a zinc nickel coating to help with corrosion, an HNBR sealing element that can withstand temperatures from -40 to 180 degrees, and allow pressing on schedule 5 – 40 pipe.
